

**IMT Objectives:**

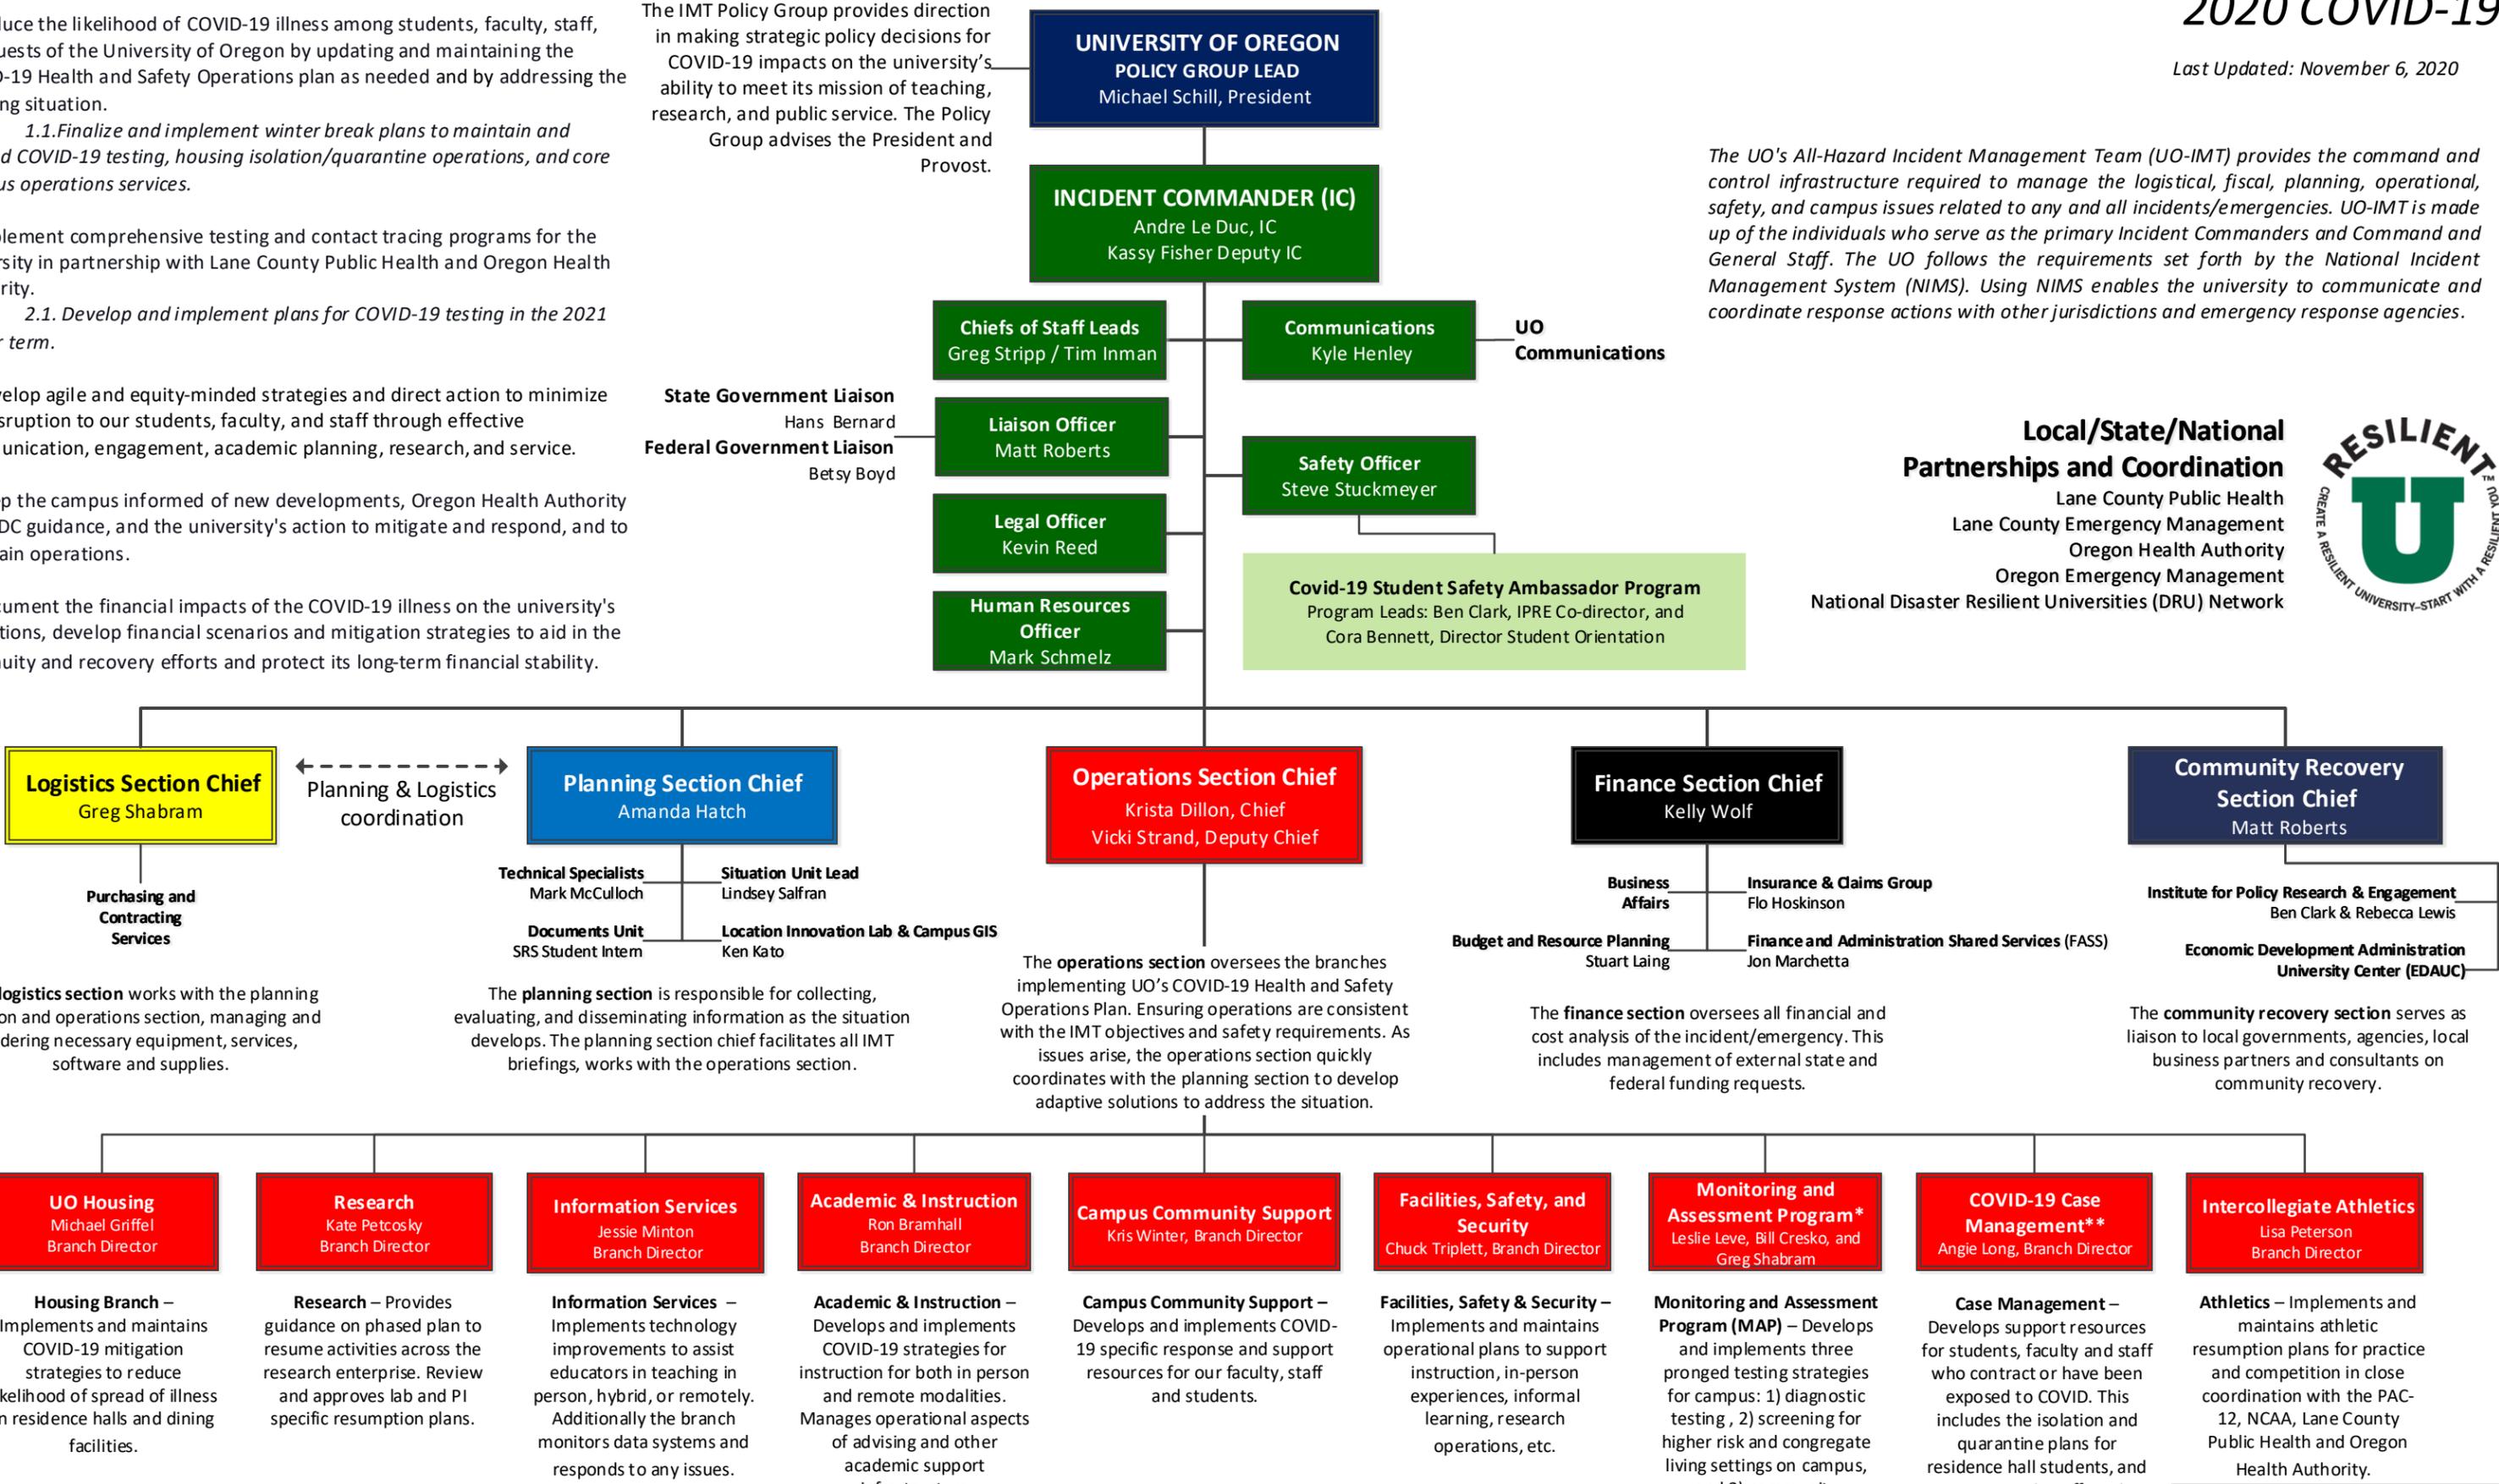

1. Reduce the likelihood of COVID-19 illness among students, faculty, staff, and guests of the University of Oregon by updating and maintaining the COVID-19 Health and Safety Operations plan as needed and by addressing the evolving situation.
  - 1.1. Finalize and implement winter break plans to maintain and expand COVID-19 testing, housing isolation/quarantine operations, and core campus operations services.
2. Implement comprehensive testing and contact tracing programs for the university in partnership with Lane County Public Health and Oregon Health Authority.
  - 2.1. Develop and implement plans for COVID-19 testing in the 2021 winter term.
3. Develop agile and equity-minded strategies and direct action to minimize the disruption to our students, faculty, and staff through effective communication, engagement, academic planning, research, and service.
4. Keep the campus informed of new developments, Oregon Health Authority and CDC guidance, and the university's action to mitigate and respond, and to maintain operations.
5. Document the financial impacts of the COVID-19 illness on the university's operations, develop financial scenarios and mitigation strategies to aid in the continuity and recovery efforts and protect its long-term financial stability.

**Policy Group**  
The IMT Policy Group provides direction in making strategic policy decisions for COVID-19 impacts on the university's ability to meet its mission of teaching, research, and public service. The Policy Group advises the President and Provost.

**State Government Liaison**  
Hans Bernard  
**Federal Government Liaison**  
Betsy Boyd

The UO's All-Hazard Incident Management Team (UO-IMT) provides the command and control infrastructure required to manage the logistical, fiscal, planning, operational, safety, and campus issues related to any and all incidents/emergencies. UO-IMT is made up of the individuals who serve as the primary Incident Commanders and Command and General Staff. The UO follows the requirements set forth by the National Incident Management System (NIMS). Using NIMS enables the university to communicate and coordinate response actions with other jurisdictions and emergency response agencies.

**Local/State/National Partnerships and Coordination**  
Lane County Public Health  
Lane County Emergency Management  
Oregon Health Authority  
Oregon Emergency Management  
National Disaster Resilient Universities (DRU) Network

The **logistics section** works with the planning section and operations section, managing and ordering necessary equipment, services, software and supplies.

The **planning section** is responsible for collecting, evaluating, and disseminating information as the situation develops. The planning section chief facilitates all IMT briefings, works with the operations section.

The **operations section** oversees the branches implementing UO's COVID-19 Health and Safety Operations Plan. Ensuring operations are consistent with the IMT objectives and safety requirements. As issues arise, the operations section quickly coordinates with the planning section to develop adaptive solutions to address the situation.

The **finance section** oversees all financial and cost analysis of the incident/emergency. This includes management of external state and federal funding requests.

The **community recovery section** serves as liaison to local governments, agencies, local business partners and consultants on community recovery.

**UO Housing**  
Michael Griffel  
Branch Director

**Housing Branch** – Implements and maintains COVID-19 mitigation strategies to reduce likelihood of spread of illness in residence halls and dining facilities.

**Research**  
Kate Petcosky  
Branch Director

**Research** – Provides guidance on phased plan to resume activities across the research enterprise. Review and approves lab and PI specific resumption plans.

**Information Services**  
Jessie Minton  
Branch Director

**Information Services** – Implements technology improvements to assist educators in teaching in person, hybrid, or remotely. Additionally the branch monitors data systems and responds to any issues.

**Academic & Instruction**  
Ron Bramhall  
Branch Director

**Academic & Instruction** – Develops and implements COVID-19 strategies for instruction for both in person and remote modalities. Manages operational aspects of advising and other academic support infrastructure

**Campus Community Support**  
Kris Winter, Branch Director

**Campus Community Support** – Develops and implements COVID-19 specific response and support resources for our faculty, staff and students.

**Facilities, Safety, and Security**  
Chuck Triplett, Branch Director

**Facilities, Safety & Security** – Implements and maintains operational plans to support instruction, in-person experiences, informal learning, research operations, etc.

**Monitoring and Assessment Program\***  
Leslie Leve, Bill Cresko, and Greg Shabram

**Monitoring and Assessment Program (MAP)** – Develops and implements three pronged testing strategies for campus: 1) diagnostic testing, 2) screening for higher risk and congregate living settings on campus, and 3) community prevalence

**COVID-19 Case Management\*\***  
Angie Long, Branch Director

**Case Management** – Develops support resources for students, faculty and staff who contract or have been exposed to COVID. This includes the isolation and quarantine plans for residence hall students, and contact tracing efforts in support of the county.

**Intercollegiate Athletics**  
Lisa Peterson  
Branch Director

**Athletics** – Implements and maintains athletic resumption plans for practice and competition in close coordination with the PAC-12, NCAA, Lane County Public Health and Oregon Health Authority.
